## SUMMARY

Product designer with 5 years in B2B SaaS — 4 at Coditas designing live-call collaboration, settings, and design-system foundations for sales-tech teams, plus 1 independent year invested in AI-assisted design (Claude, Framer, Figma MCP), portfolio rebuild, and published case studies. Strongest in B2B SaaS, design systems, and AI workspaces. Looking for a full-time Senior Product Designer role on a product I can embed with deeply.

## EXPERIENCE

**Independent Product Designer** · Self-directed Feb 2025 – Present

- Rebuilt my portfolio as a production Next.js site — tokens, components, accessibility from the ground up.
- Published three independent 2026 concept case studies: Bullpen V3, Sage AI V2, Salesync Settings V3 — clearly labeled as post-Coditas conceptual work.
- Invested in AI-assisted prototyping and design workflows: Claude, Framer, Figma MCP, modern handoff patterns.

**UX Designer** · Coditas Oct 2021 – Jan 2025

- Designed Bullpen — native sales-call collaboration that replaced a \$250/user/month external tool (CallBlitz) inside the Salesync platform.
- Reduced onboarding from 22 clicks to 3 in V2; SUS of 85 and 81.25% task success on V1 usability testing with 15 active users.
- Handed off to a 50+ cross-functional engineering team; maintained 3 design systems with strict version control.
- Designed across 10+ enterprise SaaS surfaces — admin consoles, AI workspaces, real-time dashboards, and dialer interfaces.

**Associate UX Designer** · Coditas Dec 2020 – Oct 2021

## SKILLS

**Design** Product Design · Design Systems · IA · Interaction Design

**Research** Usability Testing · SUS · SEQ · Card Sorts · Affinity Mapping

**Accessibility** WCAG 2.2 AA · Token-level contrast · Reduced motion

**Tools** Figma · Figma Variables · Framer · Claude · Storybook

**Prototyping** Next.js · Tailwind · React (for design prototypes)

## EDUCATION

**DesignBoat UI/UX School** 2019 – 2020  
UI/UX Designer

**Sinhgad College of Engineering** 2014 – 2018  
B.E. Information Technology
